# MEET THE SURVIVOR...

## BIG FOOT HEAVY DUTY PALLET RACK

Bigfoot® Rack from Lyon gets its name from the oversized 8" x 5" x 3/8" thick all-welded footplate which anchors our 12-gauge steel, 55,000 psi upright posts. The 3" x 3" uprights are slotted to allow easy beam adjustment on 2" centers. All bracing is box tubing, which produces a structurally superior member. And you can choose from three heights in two frame depths.

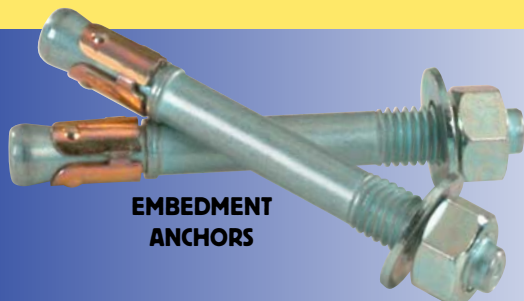

All of our 15-gauge steel, 55,000 psi beams feature a four-stud connector, welded all the way around, which utilizes a spring loaded, tamper-resistant, integral locking mechanism. Beams also offer you a choice of two lengths in capacities of up to 6,300 lbs. per level. The step beam ledge is slotted at 1" intervals to accept drop-in front-to-back supports.

Bigfoot components are finished in tough powder coat – Dove Gray on uprights and Safety Orange on beams.

Note: Uprights accept two 1/2" dia. x 4 1/2" long embedment anchors per base plate.

### BIGFOOT COMPONENTS

Cat. No.	Dimensions			Capacity	Weight	List Price
	Width	Depth	Height	(lbs.)	(lbs.)
